Allowable Subject Matter

Claims 1-36 are allowed.

The following is an examiner's statement of reasons for allowance:

Claims 1, 15, and 25:

The following prior art discloses:

- Ordille (US 2003/0217109) discloses a system that has a auto response feature with different media outputs.
- Kokko (US 2005/0129191) discloses a system that changes the format of the response text. Filing Date: April 5, 2004
- Harkins (US 5,600,781) discloses a system that changes the text and formatting of a template.
- Alam (US 6,104,500) discloses a system that converts text to email.

The prior art fails to disclose or suggest the combination of limitations recited in Claims 1, 17, and 34. More specifically, the prior art fails to disclose or suggest a graphical user interface for use in preparation of an automatically generated communication in response to an event that requires a generation of a communication. The communication is generated from a response template which contains data definitions and conditional criteria. The conditional criterion in the response template automatically

activates alternative selections of text and data according to whether the criterion is met and whether the criterion is not met; said graphical user interface comprising:

- Presenting an image of a list of at least one selectable operational options;
- Accepting selection of an operational option from the list; and
- Presenting an image of said at least one operational option selected as a chosen option list,
 - the list of said at least one selectable operational option
 - the operational option comprises a list of a plurality of different media by which the automatically generated communication can be transmitted;
 - the list of chosen options comprises at least one chosen media for transmission of the automatically generated communication; and
- The text and data content of the automatically generated communication comprises at least one of an instruction to the recipient for handling a response to the communication and an indication of a medium of an associated communication
 - at least one instruction and indication is automatically changed depending on the characteristic of the chosen media
 - the differences of the at least one instruction and indication between communications are identifiable by the recipient of a communication.

The examiner notes that these features of the automatically generated communication system are illustrated in Figures 11-16 and described in detail from Page 12, Line 1 to Page 29, Line 35 of the Specification in the present application.

Regarding Claims 1 and 34, the examiner interprets the recited "*means for*" presenting an image, accepting a selection, and automatically generating text and data content , as indicated in Figure 1 of the Drawings and discussed from Page 8, Line 15 through Page

11, Line 25 of the Specification in the present application. Accordingly, Claims 1 and 34 recites statutory subject matter, as defined in 35 U.S.C. 101.

Claims 2-16:

These claims incorporate the allowable subject matter of Claim 1 and are thus allowable.

Claims 18-33:

These claims incorporate the allowable subject matter of Claim 17 and are thus allowable.

Claims 35-36:

These claims incorporate the allowable subject matter of Claim 34 and are thus allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Soumya Dasgupta whose telephone number is 571-272-7432. The examiner can normally be reached on M-Th 9am-7pm, F 9am-1pm.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Doug Hutton can be reached on 571-272-4137. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
